

JUST THE FACTS

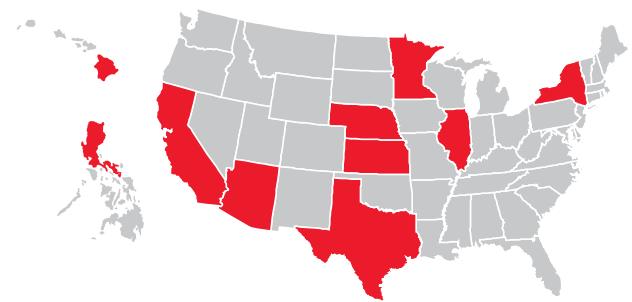

BHE RENEWABLES

TOTAL CAPACITY – OWNED AND UNDER CONSTRUCTION 4,654 megawatts

Solar	1,536 megawatts
Wind	1,665 megawatts
Geothermal	345 megawatts
Hydro	138 megawatts
Natural Gas	970 megawatts

ALICIA R. KNAPP
President and CEO

PROVIDING CLEAN ENERGY SOLUTIONS

BHE Renewables, based in Des Moines, Iowa, encompasses development, operation and commercial management of renewable projects, including solar, wind, geothermal and hydro. BHE Renewables owns and operates solar, wind, geothermal, natural gas and hydro projects that produce energy for both the wholesale market and for customers under long-term power purchase agreements.

BHE RENEWABLES OWNS 1,536 MEGAWATTS OF SOLAR-POWERED GENERATION IN OPERATION

- Topaz Solar Farms is a 550-megawatt solar photovoltaic power plant in San Luis Obispo County, California.
- The 586-megawatt Solar Star development consists of two co-located projects in Kern and Los Angeles counties, California.
- BHE Renewables owns a 49 percent interest in the Agua Caliente solar farm in partnership with NRG Energy and Clearway Energy. The 290-megawatt solar photovoltaic power plant is located in Yuma County, Arizona.
- BHE Renewables owns 28 individual community solar garden projects in Minnesota with a combined capacity of 98 megawatts.
- The Alamo 6 and Pearl solar projects are 110-megawatts and 60-megawatts, respectively, located in Pecos County, Texas.

BHE RENEWABLES OWNS 1,665 MEGAWATTS OF WIND-POWERED GENERATION IN OPERATION

- The 168-megawatt Pinyon Pines Wind I and 132-megawatt Pinyon Pines Wind II projects are located near Tehachapi, California.
- The 81-megawatt Bishop Hill II wind project is located in Henry County, Illinois.
- The 300-megawatt Jumbo Road wind project is located near Hereford, Texas.
- The 300-megawatt Santa Rita wind project is located in Reagan and Irion counties in west central Texas.
- The 72-megawatt Marshall wind project is located in Marshall County, Kansas.
- The 400-megawatt Grande Prairie wind project is located in Holt County, Nebraska.
- The 212-megawatt Walnut Ridge wind project is located in Bureau County, Illinois.

BHE RENEWABLES IS A LEADER IN THE DEVELOPMENT AND PRODUCTION OF ENERGY FROM GEOTHERMAL AND NATURAL GAS RESOURCES

- Operating as CalEnergy, the company owns 10 geothermal facilities in California's Imperial Valley. The combined net capacity at Imperial Valley is 345 megawatts.
- BHE Renewables' natural gas-fueled plants include a 512-megawatt plant in Illinois, a 212-megawatt plant in Texas, a 50-megawatt plant in Arizona and 196 megawatts of natural gas generation in New York.

BHE RENEWABLES OWNS 138 MEGAWATTS OF HYDROELECTRIC GENERATION IN OPERATION

- BHE Renewables' Wailuku hydroelectric facility, located in Hawaii, has the capacity to produce up to 10 megawatts of reliable, noncarbon energy.
- Through a build-operate-transfer arrangement with the Philippine government, BHE Renewables operates and maintains a hydroelectric power plant on the Philippine island of Luzon. The 150-megawatt Casecnan Multipurpose Irrigation and Power Project is a combined hydroelectric and irrigation facility that diverts water from the Casecnan and Taan rivers through a 16-mile-long aqueduct to a hydroelectric generating plant. BHE Renewables owns an 85 percent interest in the project.
